

298. WE-Heraeus-Seminar

New Approaches and Perspectives in Polymer Physics

Supported by the **WE-Heraeus-Stiftung**

Bad Honnef/Germany
28.-30. April 2003

<http://www.mpip-mainz.mpg.de/~heli/heraeus.html>

Confirmed Speakers

R. Bruinsma, Los Angeles (USA)
M. Daoud, Saclay (France)
R. Everaers, Dresden (Germany)
B. Jungnickel, Darmstadt (Germany)
C. Holm, Mainz (Germany)
A. R. Khokhlov, Moscow (Russia)
H.-A. Klok, Mainz (Germany)
M. Muthukumar, Amherst (USA)
R. Netz, München (Germany)
P. Olmsted, Leeds (UK)
W. Paul, Mainz (Germany)
P. Pincus, Santa Barbara (USA)
R. Podgornik, Ljubljana (Slovenia)
J. O. Rädler, München (Germany)
G. Reiter, Mulhouse (France)
Ch. Schick, Rostock (Germany)
H. W. Spiess, Mainz (Germany)
J. Widom, Evanston (USA)

Topics to be discussed

- Models and concepts for biological polymer systems
- Computer simulations: New insights and perspectives of modern simulation methods
- Self-organized polymer systems and nanostructures
- Non-equilibrium properties and metastability in polymer systems

Organized by

Jens-Uwe Sommer, Mulhouse
Helmut Schiessel, Mainz
